- Frameworks: Spring Boot, ReactJS(Prior Experience), jQuery, Bootstrap
- Databases: MySql, MongoDB
- Tools: Git, Postman, VS Code, Webstorm, Eclipse/STS
- Concepts: Data Structures & Algorithms

EXPERIENCE

Centium Consulting, Pune

- **Software Engineer**
  Feb 2025 - Present

- **Associate Software Engineer**
  Dec 2022 – Jan 2025

PROJECTS

Advanced Manufacturing Focused NetSuite Customizations:

Extensively worked on a manufacturing-focused NetSuite project, developing numerous custom solutions tailored for customer needs. This included automating processes and enhancing system functionality to meet specific manufacturing requirements.

Customizations for Various Projects:

Executed advanced customizations for diverse client projects, including those in Healthcare, Manufacturing, and various other core business cycles, to meet project-specific requirements and enhance system efficiency.

Advanced PDF Templates:

Expert in handling Advanced PDF Templates. Created the entire stack of Advanced PDF Templates for client projects, ensuring complete, branded, and accurate documents across all the transaction types.

Internal Projects / Products:

Successfully developed and optimized internal projects to assist clients in their environments. Maintained SuiteBundles/SDF's and ensured seamless deployment across multiple projects. Enhanced functionality and efficiency by implementing continuous improvements and updates.

NetSuite Cases:

Implemented smart and effective solutions for various customer cases in NetSuite. Optimized scripts, advanced pdfs to enhance case management efficiency. Ensured seamless automation and customization to meet business needs.

NetSuite Integrations:

Spearheaded the design and execution of complex NetSuite integrations with third-party systems (SFTP, Amazon S3, among others), enabling seamless data import and record creation in NetSuite from external systems, streamlining workflows. These integrations were tailored to client needs, maximizing data exchange efficiency.
